Subject: Microsoft Settlement

Hello-

I am writing this message to comment on the Proposed Microsoft Settlement for consideration in the Tunney act proceedings on this case.

I do not believe the settlement adequately discourages future unfair trade practices on the part of Microsoft. In particular, this settlement continues to allow retaliation against small OEMs that sell Intel-based computers with competing operating systems installed. (Section III-B and Section III-A-2)

This is only one of the many flaws in this settlement.

The country is watching.

We understand what this case is about.

We expect Justice.
